

CASE STUDY

Simply move your office to wherever you need it

Thanks to 2N® OfficeRoute you can have a one-box mobile office communications solution which covers all the functions you need to stay connected without a fixed line. Internet access, PBX features for up to 30 internal IP clients and FAX all in one wireless box. You can have all the convenience of being in an ordinary office without the limitation of being tied to one location. Therefore it is very suitable for small offices which frequently need to move from one place to another, such as construction companies.

What features does it include?

- High-speed data connection
- IP PBX features – up to 30 internal IP clients
- Sending/receiving analogue FAXes
- Sending/receiving SMS from an e-mail client
- 2N® Mobility Extension (a feature which enables you to use your mobile phone as if it were a desk phone connected to the PBX)

What benefits does the mobile office offer?

- No incoming wires – easy to move the whole office to another location (no new contracts and waiting, no new phone numbers)
- Cost savings on calls
- All users can stay in contact wherever they are
- Plug & Play installation

Benefits for the operator

- Beat ADSL with a complete 3G voice and data solution
- Reach a new segment with a mobile one-box solution
- Easy remote maintenance

Who is the mobile office intended for?

- Construction companies
- Boats
- Branches of banks, post offices
- Newly established companies
- ...anywhere where you appreciate the mobility of a communication solution
